Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This risk and reward indicator illustrates where the Compartment is positioned in terms of its possible risk and reward. The higher the Compartment’s position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time. Even if the Compartment is in the lowest risk class you can lose money, as no investments are entirely risk free. This Compartment is in category 3 since the price changes of the Compartment have been low in the past. The following risks are not fully reflected in the above classification but still influence the Compartment's value. Further information about risk can be found in the investment memorandum which is available at the registered office of the AIFM upon request.

Liquidity risk: Some of the assets of the Compartment may become difficult to sell at a certain time and for a reasonable price.
