RISK AND REWARD PROFILE

Meaning of the risk and reward indicator

The risk indicator aims to provide you a measure of the price movement of the shares. This category 4 means that the share price has an average price movement therefore the risk of loss as well as the expected reward can be medium. The lowest category does not mean a "risk free" investment.

Historical data may not be a reliable indication for the future. The risk indicator shown is not guaranteed and may change over time. There is no capital guarantee or protection on the value of the Sub-Fund.

Reason why the Sub-Fund is classified in this risk category

Fund volatility corresponds with the investment strategy.

The following risks may not be fully captured by the risk indicator and may be materially relevant for this Sub-Fund:

Counterparty risk: the risk arising from the inability of any party contracting with the Fund to satisfy its obligations, in particular in respect of off-exchange financial transactions where the market does not guarantee the performance of contracts in case of defaulting counterparties.

Credit risk: the risk arising from the inability of an issuer of Debt Securities to pay interests or repay the sum borrowed under the Debt Securities.

Hedged Strategies risk: the risk arising from improper hedging (e.g. when hedging insufficiently reduces the loss of capital or significantly reduces the potential rate of return of the investment hedged).

Emerging Markets risk: the risk arising from investing in a market with less developed political, economical and legal framework.

Equity Securities risk: the risk involved in holding Equity Securities in a particular company and whose value may decline as a result of the underperformance of such company or of external factors affecting the company such as economic, political or market changes.

Further investment risks are set out in the risk section of the prospectus.
